

Jones County Coronavirus (COVID-19) Results by Demographics August 18, 2020

The following graph shows the breakdown of demographics of residents who have received a Coronavirus (COVID-19) test. These graphs do include the data from the two testing events and the outbreak at the congregate living setting. The total number of COVID-19 tests will differ from these graphs since some individuals have been tested more than once.

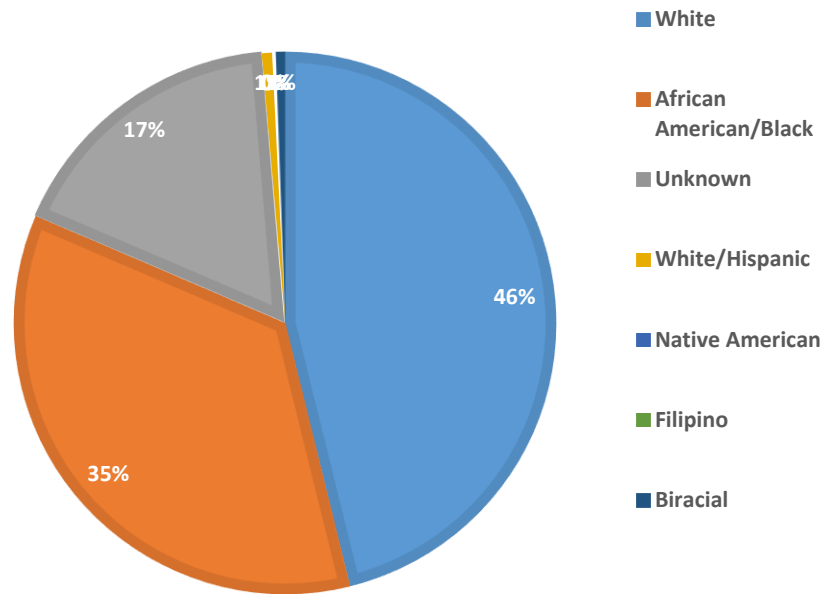

| Gender | Numbers |
|---------|---------|
| Male | 455 |
| Female | 698 |
| Unknown | 4 |

COVID-19 TEST RESULTS BASED ON GENDER

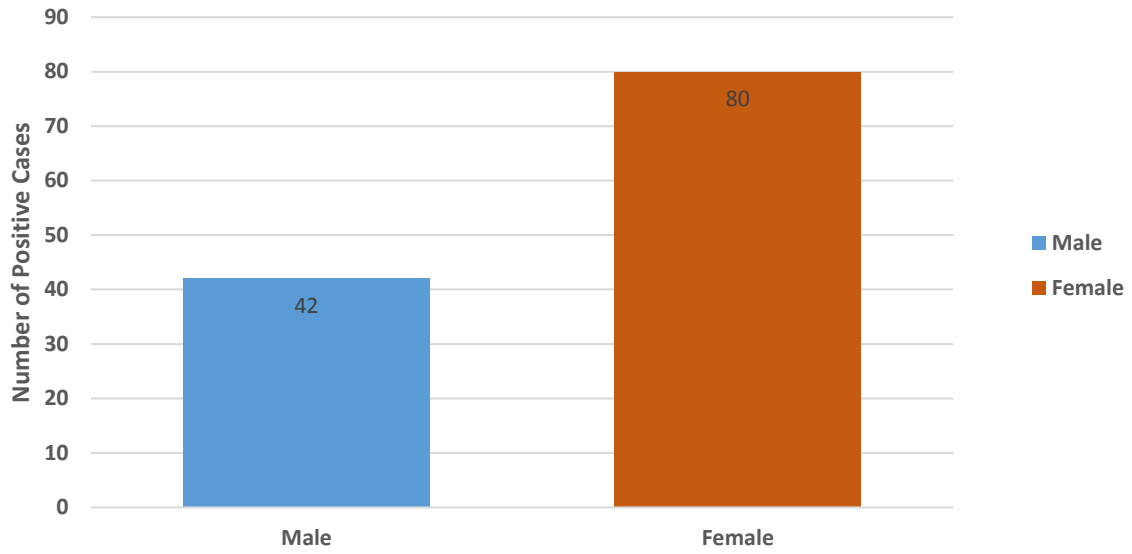

PERCENTAGE OF COVID-19 COMPLETED TESTS BY RACE

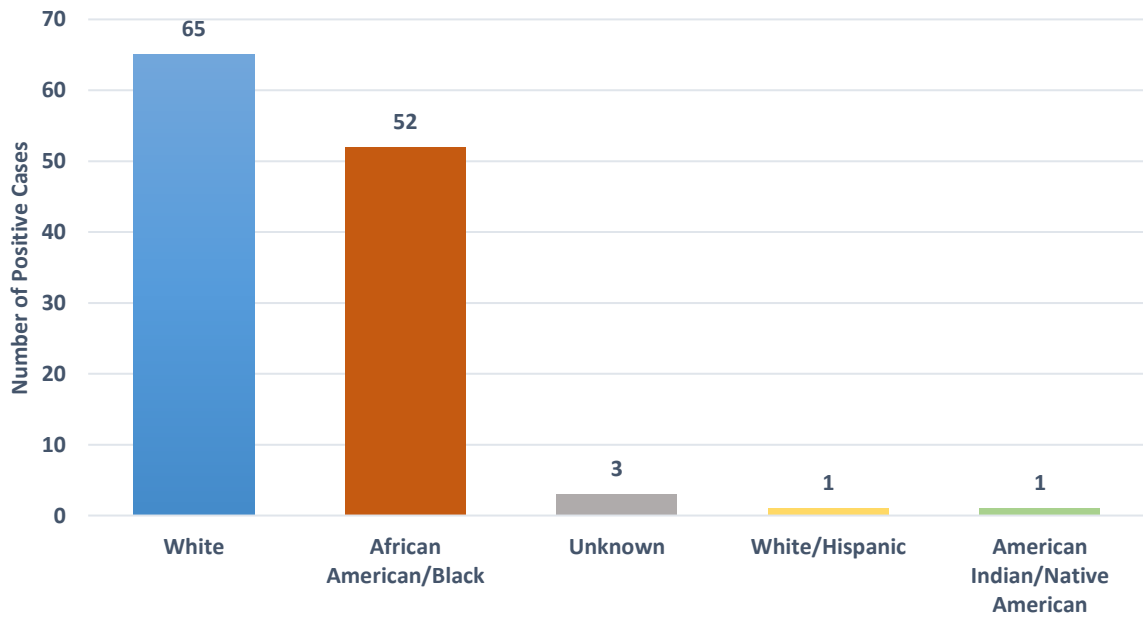

| Race | Number of Tests |
|------------------------|-----------------|
| White | 545 |
| African American/Black | 417 |
| Unknown | 203 |
| White/Hispanic | 7 |
| Native American | 2 |
| Filipino | 1 |
| Biracial | 6 |

*Note: Not all testing facilities have captured data on race/ethnicity, which is why you see a high number in the unknown category.

COVID-19 POSITIVE CASES BY GENDER

POSITIVE CONFIRMED CASES BY RACE
